## EXPERIENCE

---

### ACCENTURE

June 2024 – Current

#### Software Developer (Associate Team Lead)

- Spearheaded the Next.js-based frontend development of a RM30 million financial banking web application, aimed at enhancing customer engagement, with projected improvements including a 51% increase in engagement rate and an impressive 4000% growth in customer interactions across several countries.
- Entrusted with the responsibility of serving as the associate team lead, contributing significantly to the project's success over the course of nine months and still ongoing.
- Led the creation of comprehensive documentation and provided training to new team members, ensuring smooth onboarding and knowledge transfer across the development team.

### KATSANA FLEET SERVICES

November 2023 – June 2024

#### Web Developer (UI/UX Designer / Frontend Developer)

- Designed cohesive websites, tablet, and mobile mock-ups using Figma, while also presenting design concepts and proposals to management for approval and implementation.
- Led UI/UX enhancements for both existing and new products, guiding the process from conceptualization to high-fidelity web designs and prototypes.
- Developed reusable components using Vue.js and Tailwind CSS while delving into PHP Laravel, elevating user experience and interactions through refined coding practices.

### TRINERGY DIGITAL

March 2021 – October 2023

#### Digital Developer

- Contributed to over 6 projects using various libraries and frameworks such as jQuery, Pug, Vue, React, Node.js and Bootstrap, ensuring the creation of responsive, error-free and intuitive websites experiences tailored to the specific needs of banking clients.
- Pioneered the implementation of OpenText CMS, leading a team of developers using Agile methodology to revamp corporate websites while maintaining existing functionality.
- Trained customers and team members on website maintenance and updates while creating comprehensive documentation, increasing maintainability and reduction in support requests.
- Built a frontend module of an Online Banking DuitNow QR native mobile application using Kotlin in Android Studio.

### TELEKOM MALAYSIA (TM) ALPHA LAB

April 2019 – June 2019

#### Internship

- Researched and implemented front-end enhancements for the company's web portal via ColdFusion, making the portal more user friendly and accessible.

## EDUCATION

---

### Multimedia University (MMU), Cyberjaya

#### Bachelor of Computer Science

- Major in Data Science, with experience in utilizing Python and JavaScript to build an AI chatbot web application from scratch using Machine Learning for my Final Year Project. Scholarship recipient under YTM for academic performance. IT Society member and a humanitarian volunteer.
